

HPE SN1200E 16Gb Dual Port Fibre Channel Host Bus Adapter (Q0L14A)

Host Adapters

What's new

- 16 Gb Single Port Fibre Channel Host Bus Adapter
- 16 Gb Dual Port Fibre Channel Host Bus Adapter

Overview

Is your data center poised to take the 16 Gb step in Fibre Channel (FC) connectivity?

The growth in enterprise flash storage and the deployment of servers with multi-core processors is driving the need for high performance storage networking to prevent application performance bottlenecks. The FC Host Bus Adapter (HBA) is a critical element of this storage network to improve storage performance.

The HPE SN1200E 16Gb Fibre Channel Host Bus Adapters deliver the high bandwidth, low latency and high IOPs to meet any application requirements, from online transaction processing or data warehousing to backup/restore and OpenStack Cinder block storage.

Supporting higher virtual machine density on powerful host servers, the SN1200E 16Gb HBAs delivers increased ROI on enabling more applications and virtual machines to run on a single server and I/O port without impacting SLAs. The 16 Gb FC HBA is backward compatible with 8 and 4 Gb FC storage networks to protect legacy investments.

Features

The High Performance Fibre Channel Host Bus Adapters

The HPE SN1200E 16Gb Fibre Channel Host Bus Adapters deliver twice the I/O performance of 8Gb Fibre Channel (FC) Host Bus Adapters (HBAs) while being backward compatible with 8 and 4Gb FC environment.

Moving to 16 Gb technology provides the infrastructure required for the more powerful servers and data intensive applications of the future.

When using storage intensive applications like backup/restore, database transactions, virtualization and rich media, the improved I/O performance enables faster storage and retrieval of data.

Faster Flash

The HPE SN1200E 16Gb Host Bus Adapters accelerate the time to business insight by completing data warehousing queries faster than 8 Gb FC HBAs.

Meets the massive bandwidth requirements of flash storage arrays.

Increases the performance of flash-based storage by prioritizing mission critical traffic in congested networks with exclusive ExpressLane feature.

Better Virtualization

The HPE SN1200E 16Gb Host Bus Adapters provides near limitless scalability to support increased virtual machine (VM) density with 2x more on-chip resources and bandwidth than previous offerings.

Improves the virtual desktop infrastructure (VDI) end-user experience with low latency features providing noticeable improvements during boot storms (degradation of service that occurs when a significant number of end-users boot up within a very narrow time frame and overwhelm the network).

Simplifies management and installation with OneCommand Manager plugin for VMware® vCenter® server.

Enhanced Features

The HPE SN1200E 16Gb Fibre Channel Host Bus Adapters are designed to support emerging NVM Express (NVMe) over Fibre Channel storage networks.

Provides latest security features that averts unauthorized access to the Host Bus Adapter (HBA) firmware.

T10 Protection Information (T10-PI) data integrity with high performance hardware offload provides data protection from the server to the storage array.

Technical specifications

HPE SN1200E 16Gb Dual Port Fibre Channel Host Bus Adapter

Product Number	Q0L14A
Compatible operating systems	Please visit https://www.hpe.com/storage/spock for the latest available information on Operating System support
Product Dimensions (metric)	120.7 x 21.5 x 185.7 mm
Weight	154 g

For additional technical information, available models and options, please reference the [QuickSpecs](#)

HPE Pointnext Services

HPE Pointnext Services brings together technology and expertise to help you drive your business forward and prepare for whatever is next.

Operational Services from HPE Pointnext Services

HPE Pointnext Tech Care provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

HPE Pointnext Complete Care is a modular, edge-to-cloud IT environment service that provides a holistic approach to optimizing your entire IT environment, and achieving agreed upon IT outcomes and business goals through a personalized and customer-centric experience. All delivered by an assigned team of HPE Pointnext Services experts.

HPE Integration and Performance Services help you customize your experience at any stage of your product lifecycle with a menu of services based on individual needs, workloads, and technologies.

- Advise, design, and transform
- Deploy
- Integrate and migrate
- Operate and improve
- Financial Services
- GreenLake Management Services
- Retire and sanitize
- IT Training and personal development

Other related services

HPE Education Services delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation. Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.

Defective Media Retention is optional and allows you to retain Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

HPE GreenLake

HPE GreenLake is HPE's market-leading IT as-a-Service offering that brings the cloud experience to apps and data everywhere – data centers, multi-clouds, and edges – with one unified operating model. HPE GreenLake delivers public cloud services and infrastructure for workloads on premises, fully managed in a pay per use model.
